**Marketing Data Analyst** with **3+ years** of experience in Real Estate, Healthcare, and **Data Analytics**, specializing in marketing, customer, web, and operational data analysis. Skilled in **SQL, Python, Power BI, Excel, GA4, Power Query, ETL**, dashboard development, **attribution analysis**, and **KPI** reporting, with experience building **automated reporting, lead management**. in integrating multi source data, building automated reporting and lead management workflows, identifying attribution and measurement gaps, and developing performance frameworks that help cross functional teams evaluate campaigns, prioritize growth opportunities, and streamline business processes and marketing decisions.

## TECHNICAL SKILLS:

**Programming & Query Languages:** SQL, Python (Pandas, NumPy), R, VS Code

**Business Intelligence & Visualization:** Power BI, Tableau, Power Query, DAX, Microsoft Excel (Advanced)

**Databases:** Microsoft SQL Server, MySQL

**Web & Marketing Analytics:** Google Analytics 4, Adobe Analytics, Google Tag Manager, Google Ads, Meta Pixel, Google Search Console, HubSpot, Mail Chimp, GEO, Diib

**Data Analysis & Reporting:** Data Analysis, Data Validation, Data Cleaning, Exploratory Data Analysis (EDA), KPI Reporting, Dashboard Development, Data Visualization,

**Marketing Analytics:** Predictive Analytics, Web Analytics, Digital Analysis, Funnel Analysis, Cohort Analysis, Customer Segmentation, A/B Testing, Conversion Rate

Optimization, CAC, ROAS, KPI Development, Trend Analysis, Market Research, conversion analysis, traffic source analysis, landing page analysis, user engagement analysis

**ETL & Data Integration:** SSIS, ETL, Data Transformation

**Collaboration & Version Control:** Git, Jira, VS Code

## EXPERIENCES:

**Technology Marketing Analyst | Westside Property Management | Aug 2025 – Present**

**Project:** Property Operations, Marketing Analytics & Digital Growth Platform

- Architected an event driven **tracking framework** using **GA4, Google Tag Manager**, and **Meta Pixel**, defining **10+ custom events** to improve marketing attribution and **website engagement reporting**.
- Built and maintained **Power BI** dashboards using **SQL, Power Query**, and **DAX** to monitor occupancy, leasing activity, **marketing campaigns, website traffic**, and executive **KPIs** across a portfolio of nearly **2,000 managed units**.
- Developed **SQL** queries and **ETL** processes to consolidate CRM, property management, and digital marketing data into centralized reporting datasets, reducing manual report preparation by nearly **20%**.
- Performed data analysis using **Python (Pandas, NumPy)** and **Advanced Excel** to evaluate leasing trends, customer behavior, lead sources, campaign effectiveness, and property performance, supporting data driven business decisions.
- Automated lead management workflows using **Google Apps Script** and **Mailchimp**, supporting outreach campaigns that generated and tracked approximately **300-400 qualified leads each month**.
- Evaluated **HubSpot** for lead capture, lifecycle tracking, automated follow ups, campaign reporting, while designing **CRM workflows** to reduce repetitive marketing activities and strengthen lead management processes.
- Optimized high traffic pages using **Adobe Analytics**, audience segmentation, **funnel analysis, session recordings**, and **A/B testing** to identify owner lead drop offs, high exit pages, attribution gaps, and engagement opportunities, increased average order value by **4.5%**, reduced bounce rate by **15%**.

**Data Analyst | Baylor Scott & White Health, Dallas, TX | Jul 2024 – Apr 2025**

**Project:** Patient Access, Referral & Service Line Analytics

- Developed **SQL Server** queries and **SSIS** workflows to integrate patient appointment, referral, **demographic**, and service line data from **Epic EHR**, supporting reporting for approximately **18 outpatient clinics**.
- Designed and maintained **Power BI** dashboards that tracked patient access, referral conversion, appointment utilization, provider performance, and service line **KPIs** used by operations and marketing teams.
- Performed data validation and **exploratory analysis** using **SQL, Python**, and **Excel**, helping reduce manual data preparation effort by approximately **25%** through reusable validation processes.
- Integrated **GA4** website performance data with online appointment and referral records to analyze patient acquisition, **engagement, conversion funnels**, and specialty campaign effectiveness, informing targeted outreach initiatives that contributed to an approximately **12%** increase in online appointment requests.
- Worked with business analysts, patient access teams, **marketing stakeholders, QA**, and production support to validate reporting requirements, **test dashboard** enhancements, and **resolve** production **data issues** using **Jira**.
- Maintained **SQL scripts, ETL** packages, and reporting assets using **Git**, while supporting scheduled report refreshes monitoring to ensure reliable dashboard delivery.

**Marketing Data Analyst | Zemoso Technologies Private Limited, Hyderabad, India | Jan 2022 – Aug 2023**

**Project:** Customer Acquisition & Marketing Analytics Platform

- Queried and analyzed subscriber, campaign, and digital marketing data using **SQL**, and **Python** to support weekly **KPI reporting** and campaign **performance analysis**.
- Cleaned and validated marketing datasets using **Python** and **Microsoft Excel**, ensuring accurate reporting for customer acquisition, retention, and wireless plan performance metrics.
- Built interactive dashboards in **Power BI** and **Tableau** to track campaign effectiveness, channel performance, customer behavior, and marketing funnel metrics for business stakeholders.
- Used **Adobe Analytics** and **Google Tag Manager (GTM)** to monitor website traffic, user engagement, conversion funnels, and campaign attribution across digital marketing channels.
- Performed **customer segmentation, A/B testing, customer churn analysis**, and **trend analysis** to evaluate promotional offers and support marketing decisions for subscriber growth and retention.

## EDUCATION

**M.S. in Business Analytics & Artificial Intelligence | The University of Texas at Dallas | Aug 2023 – May 2025**

**Relevant Coursework:** Marketing Data Analysis and Research, Web Analytics, Data Visualization, Predictive Analytics, Database Management, Advanced Statistics, Time Series Analysis, Business Analytics with R, Big Data, Cloud Computing, Prescriptive Analytics.

**Bachelor of Business Administration (Marketing) | St. Mary's College | Jul 2020 – Jun 2023**

**Relevant Coursework:** Marketing Research, Consumer Behavior, Advertising & Sales Promotion, Customer Relationship Management (CRM), Business Analytics, Data Visualization, Business Statistics, Financial Management, Information Technology.

## PROJECTS

**WPM Lead Intelligence & Attribution Dashboard | Git:** <https://github.com/AnoohyaAlluri/lead-intelligence-system>

**Python | SQL | Power BI | Google Analytics 4 (GA4) | Google Ads | VS Code | Git | May 2026 – Jun 2026**

- Architected a centralized lead intelligence system consolidating **788 lead records** from website, advertising, phone, email, referral, social, direct-mail, and operational sources across **10+ acquisition channels**.
- Engineered **Python and SQL** workflows to clean, standardize, deduplicate, validate, and reconcile fragmented lead data, including **94 records** matched to outcomes.
- Applied **attribution and funnel analysis** to identify **109 converted leads**, calculate a **13.8%** overall **conversion rate**, classify **91 high value leads** for performance analysis.
- Developed an executive **Power BI dashboard** for monitoring source performance, funnel movement, **conversions, lead drop off**, and segmented **follow up**, while establishing the foundation for revenue and marketing **ROI attribution**.

**SEO, AEO & GEO Search Analytics Framework | Git:** <https://github.com/AnoohyaAlluri/seo-aeo-geo-local-growth-framework>

**HTML | WordPress | Google Analytics 4 (GA4) | Google Search Console | Python | Mar 2026 – May 2026**

- Spearheaded an integrated **SEO, AEO, and GEO** optimization framework, implementing answer first content, internal linking, localized topic clusters, and freshness controls to improve traditional and **AI search** visibility
- Analyzed acquisition, landing page, engagement, and search query data across **Adobe and Google Search Console** to uncover visibility gaps, underperforming content, and conversion opportunities across 1,800+ monthly **search impressions**.
- Developed and evaluated a web performance measurement system tracking impressions, clicks, **CTR, organic sessions, indexing, AI referral traffic**, content updates, and **CTA** engagement across **8+ search** and **conversion KPIs**.
